

e-Portfolio Resources

<p>Educause Connect An Overview of E-Portfolios</p>	<p>http://connect.educause.edu/Library/ELI/AnOverviewofEPortfolios/39335?time=1213827677</p> <p>Abstract: E-portfolios are a valuable learning and assessment tool. An e-portfolio is a digitized collection of artifacts including demonstrations, resources, and accomplishments that represent an individual, group, or institution. This collection can be comprised of text-based, graphic, or multimedia elements archived on a Web site or on other electronic media such as a CD-ROM or DVD. An e-portfolio is more than a simple collection—it can also serve as an administrative tool to manage and organize work created with different applications and to control who can see the work. E-portfolios encourage personal reflection and often involve the exchange of ideas and feedback. Three types of e-portfolios are described in this report: student e-portfolios, teaching e-portfolios, and institutional e-portfolios. E-portfolios can support student advisement, career preparation, and credential documentation; the sharing of teaching philosophies and practices; department and program self-studies; and institutional and program accreditation processes. This report defines and categorizes e-portfolios, offers examples of higher education e-portfolio implementations, reviews e-portfolio technology, and addresses adoption issues.</p>

[Tools] Studies (or publications) highlighting the (e)functions eportfolios should have	<p>From a technical perspective, look at the features glossary of the review of seven ePortfolio products conducted by EduTools in 2006: http://eportfolio.edutools.info/static.jsp?pj=16&page=HOME</p> <p>http://eportfolio.edutools.info/item_list.jsp?pj=16</p> <p>Here, you'll find a review of Taskstream, Angel, OSP, eFolio, Livetext, Blackboard. These are not all vendors of eportfolios in the US, but it's representative.</p> <p>http://elgg.org/ Elgg is a robust open source social application engine. Elgg provides elegant, flexible and scalable solutions for organisations, groups and individuals. Take advantage of powerful social technology today. From a full social networking site to an iPhone widget, Elgg can power it all.</p>

<p>[Tool] FolioMaker http://www.foliosinternational.com/about_fm.php</p>	<p>FolioMaker is an Application that creates digital portfolios. Our aim is to keep things as simple as they need to be, thus allowing the user to concentrate on their content rather than the container. With FolioMaker a user simply clicks on the interface to insert their content (docs, video, audio images etc), they can then choose to burn the portfolio to disc or save it to a network or removable storage device.</p> <p>When a school licenses FolioMaker they actually get a tailor-made piece of software with the school logo and colour, so it becomes a great "marketing tool" for the school.</p>
