

## Want the Latest Articles from Your Favorite Journal (indexed in PubMed)?

- On the Library's Online Article Indexes & Databases page, click on [Citation Matcher](#).
- In the Journal box, start typing the name of your favorite journal, select the title that matches, and click the [Go](#) button.
- On the next screen, click the [Save Search](#) link to the right of the search box.
- Sign into your [MyNCBI](#) account. If you don't have one, click on [Register](#) and sign up for one. After you have registered, sign into your account and select [Save](#) and [Yes](#) to have the latest articles of this journal emailed to you on the frequency you select and in the format you select.
- Do this for as many of your favorite journals as you wish. If the journal is one that the Library gets full-text online, then a Samuel Merritt University icon will also show up  when you are in the Abstract format; you can click on it for the full-text of the article. If the Library doesn't have it use the [Request an Article or a Book form](#) to request it.
