

Snap enhancements

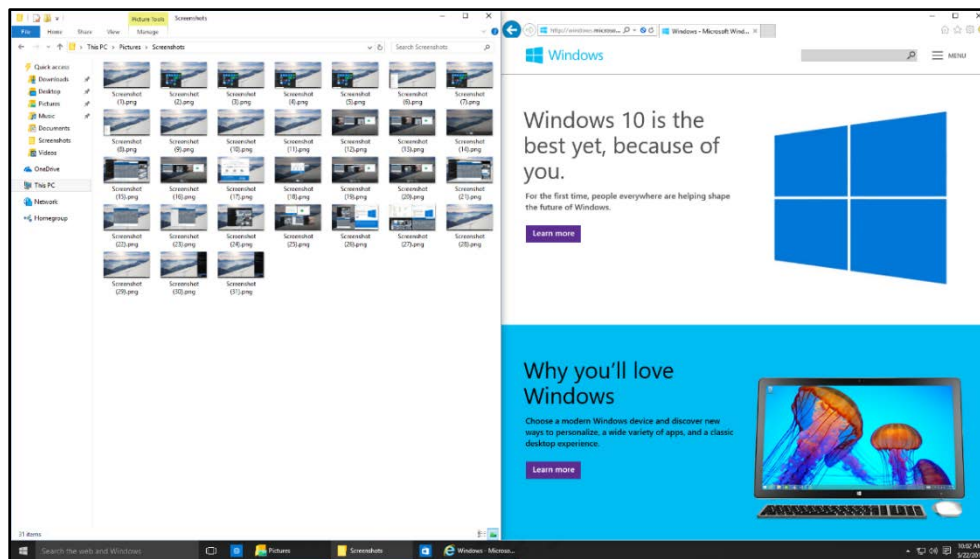

Windows 10 includes several enhancements to making it easier to manipulate the layout of open windows on your desktop. These enhancements include:

- Snap Assist, which makes it easy to snap additional windows after the first one.
- Four-quadrant Snap, which enables you to fill your screen with four apps in a two-by-two configuration.

Snapping two windows side by side

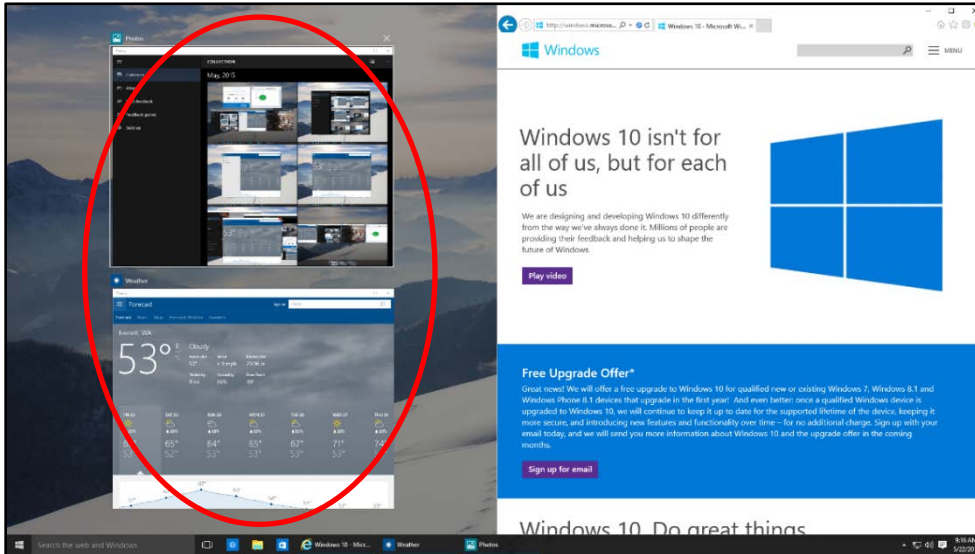

To arrange two windows side by side on the screen:

1. Drag the title bar of a window to the left or right side of the screen, until a half-screen outline of the window appears.
2. Release the mouse (or lift your finger) to snap the window into position.
3. Repeat steps 1 and 2 for the other window, using the other side of the screen.

Snap Assist

When you snap an app to the left or right, Snap Assist displays thumbnails of your other open apps—just select one to snap it to the other half of your screen.

Quadrant snap

To arrange four windows in a two-by-two configuration on the screen:

1. Drag the title bar of the first window to the left or right side of the screen *near a corner*, until a quarter-screen outline of the window appears.
2. Release the mouse to snap the window into position.
3. Repeat steps 1 and 2 for the other three windows, using the other corners of the screen.
