How to Access Reports and Grade Turnitin Assignments

Overview:
The interaction between Turnitin and Canvas continues to evolve and improve. We now recommend that faculty set up Turnitin in assignments using the "Online" submission type instead of "External Tool." Advanced settings are also now available during set-up. See How to Set Up Your Turnitin Assignments for more information.

You can grade Turnitin assignments using SpeedGrader, including scoring the Canvas rubric and giving general and detailed comments. You will not be able to use Turnitin's GradeMark feedback tool in place of SpeedGrader. If you'd like more information about how to use the GradeMark feature in your Turnitin assignments, contact Michelle Boyd.

Grading Resources:
1. To learn how to **access** the student's submission and its originality/similarity report, review the instructions in Accessing the Similarity Report.

2. To learn how to **view** and **interpret** originality/similarity reports, review the detailed instructions in Interpreting the Similarity Report.

3. To learn how to give **general feedback** for a Turnitin assignment using SpeedGrader, review How do I leave feedback comments for student submissions in SpeedGrader?

4. To learn how to give **detailed feedback** in a Turnitin assignment using SpeedGrader, review How do I use DocViewer in Canvas assignments as an instructor?

Help:
Contact Canvas 24/7 at 888-233-7764 with any challenges. Be sure to tell the support person that you need help with a "legacy API" assignment submission in Turnitin. Contact Michelle Boyd for additional support.
